

SRS Consultancy
Strategize. Re-design. Succeed.

MEET THE FOUNDER

Founded by industry veteran, S.R. Sathyanarayanan, with a rich educational background (bachelor's in metallurgy from NIT, Trichy and master's in Engineering Business Management from Warwick University, UK), and over three decades of deep-rooted expertise in operations and quality management, SRS consultancy is committed to helping businesses integrate strategy, process and technology to drive transformation. His journey began in 1990 with the TVS Group and spans a distinguished career across renowned automotive and engineering organizations including Sundram Fasteners, Sanmar, Ford Motors, Lucas TVS, Emerson, Flowserve, Trillium Technologies

WHAT WE DO

OPERATIONAL EXCELLENCE

Lean and Six Sigma methodologies, Business Process Reengineering (BPR), and cost optimization strategies to drive continuous improvement and competitive advantage.

QUALITY & COMPLIANCE

End-to-end Quality Audits, 6S audits, Total Quality Management (TQM), and Total Productive Maintenance (TPM) for robust process discipline and compliance.

PRODUCT & PROCESS INNOVATION

New product development, process redesign, plant layout optimization, and automation projects tailored for scalable growth.

WASTE ELIMINATION & EFFICIENCY

Implementation of War on Waste (WOW) initiatives, resource optimization, and streamlined workflows to enhance productivity and reduce losses.

SMART MANUFACTURING SOLUTIONS

Integration of IoT, machine automation, and barcode-based systems to monitor performance, improve traceability, and boost operational efficiency.

CAPABILITY BUILDING

Customized training, talent development, and recruitment strategies aligned to support operational transformation and sustain long-term success.

SRS CONSULTANCY SERVICES

S.R. SATHYANARAYANAN

ASSOCIATED WITH

WHY CHOOSE SRS?

Trained in Japan Institute of Plant Maintenance (JIPM) under the guidance of Suelo Yamaguchi - San, (TPM guru) to implement TPM and achieved TPM award

Collaborated with Prof. Hiroyuki Hirano (credited with developing 5s and JIT) for single-piece flow lines, productivity improvements, Lean, capacity and resource utilization analysis

Teamed up with Prof. Yoshikazu Tsuda for TPM implementation to achieve the Deming Prize in TVS group of companies

Implemented bar code software to automate inventory control and cycle time and online capture of production data

Offering a wide variety of specialized training courses and certified programs through CII - focused on various aspects of business development.

Supporting various large-scale and SMEs enterprises with online training and on-site guidance in recruitment, sourcing, supplier and product development, and plant layout optimization.

Working closely with CII as a jury member for Pinnacle awards for Excellence in Manufacturing.
